

It seems clear to many (including the ARRL) that this proposed venture will cause interference to many (including the U S Government) throughout the HF spectrum. Also, there will be inadvertent interference to the BPL users by FCC licensed transmitters.

These will be very difficult to track down and fix.

We have many routine power line troubles today; ref

James Lewis of CSIS commenting on CNN 8-16-03 about the Black Out 03; it is unwise to add NEW applications to an outmoded power grid.

Trials to date are NOT promising. Please slow this down for review.
